Summary

Full-stack MERN developer with experience building and shipping production applications used by 500+ users. Specializes in React, Node.js, Express, and MongoDB, with additional experience in Three.js and motion-driven interfaces.

Education

Datta Meghe College of Engineering

B.Tech. in Computer Engineering

Abhishek Vidyalayam

HSC, Science Stream

Elpro International School

CBSE, Classes 7–10

Sept. 2024 – Present

GPA: 8.365 / 10

July 2022 – April 2024

May 2017 – May 2022

89%

Experience

Frontend Intern

Datta Meghe College of Engineering

August 2025 – March 2026

- Led frontend development for SIMS, a college management system serving 500+ students daily across academics, internships, and placements.
- Delivered features end to end across React, Express, and MongoDB, from UI implementation to API integration and testing.
- Integrated third-party APIs, including OpenWeather and Leaflet, into live student-facing views.

Tech Team Contributor

CSI-CATT

July 2025 – Present

- Built and shipped a working prototype under hackathon constraints, reaching the top 8 out of 100+ teams at Code-A-Thon 2.0.
- Developed internal tools and UI components used across club events and initiatives.

Freelance Developer

Self-employed

January 2026 – Present

- Delivered end-to-end MERN projects for clients, covering UI, backend, database, API integration, and deployment as the sole developer on each engagement.

Projects

Singularity

Top 8 Finalist, Code-A-Thon 2.0

Full-stack space exploration dashboard pulling live data from NASA, SpaceX, and ISRO. Includes live ISS tracking, a 3D WebGL globe, aurora heatmaps, gamified learning, and an AI chatbot. *React, Three.js, Node.js, MongoDB, Gemini AI, Framer Motion.*

[Live](#) | [GitHub](#) | [Demo](#)

SIMS – Student Information Management System

Shipped to 500+ users

Student Information Management System for academic records, internships, placements, and achievements across multiple roles. Owned frontend development end to end for a live deployment used by the college community. *React, Vite, Tailwind, Node.js, MongoDB, JWT.*

[Live](#)

Recipe App

AI-Powered Cooking Assistant

Turns available ingredients into recipe suggestions and nutrition breakdowns, with personalized recommendations based on taste history. *React, Node.js, MongoDB, Groq API, Tailwind.*
