Professional Summary

Second-year B.Tech Computer Engineering student with hands-on MERN full-stack experience. Built responsive React frontends, Node/Express backends and MongoDB databases for real projects — integrating RESTful APIs (OpenWeather), geospatial mapping (Leaflet), and voice-to-text input to improve accessibility. Strong collaborator in team environments (HOD-approved internship team and CSI-CATT), experienced with Git workflows, API testing (Postman/Insomnia), and deployment support. Seeking internships or freelance roles in Fullstack / MERN development.

Skills

Technical: JavaScript (ES6+), React.js, Node.js, Express.js, MongoDB, RESTful API design, CRUD operations, HTML5, CSS3, Tailwind CSS, Bootstrap.

Tools: Git & GitHub, VS Code, Postman, Insomnia.

Integrations: OpenWeather API, Leaflet.js (maps), Voice-to-Text APIs, image upload handling.

Other: Responsive Web Design, Component-driven UI, Basic deployment support, Problem-solving, Team collaboration.

Languages: English (Professional), Hindi (Native), Marathi (Native/Fluent).

Experience

Intern / Team Member — HOD-approved College Internship, Datta Meghe College Of Engineering
Ongoing

- Contribute to full-stack projects in a 7-member team: developed React components, built Express endpoints, and modeled data in MongoDB to support CRUD workflows.
- Integrated external RESTful APIs (OpenWeather) and mapping features (Leaflet) to enrich application functionality.
- Implemented voice-to-text input for user data collection to support low-literacy users and improved accessibility.
- Used Git for version control, Postman/Insomnia for API testing, and followed collaborative development practices.

CSI-CATT Tech Team — Contributor

Ongoing

- Improved college web pages and event tooling by implementing UI updates, wiring backend endpoints, and fixing frontend bugs.
- Participated in rapid prototyping during hackathons and technical events.

Freelance / Personal Projects — Fullstack Developer

Present

- Designed and deployed multiple MERN projects demonstrating end-to-end development: frontend, backend, database, API integration, and basic deployment steps.

Education

B.Tech, Computer Engineering

Datta Meghe College Of Engineering, University of Mumbai

Expected graduation: 2028

Current GPA: 8.365 / 10

Selected Projects

- **SIH — Health Data Management for Migrant Workers**

Built a multi-stakeholder system (migrants, supervisors, government) for tracking health and infection risk. Implemented backend CRUD services, notification logic, and voice-to-text data entry to support accessibility. (React, Node/Express, MongoDB, voice-to-text API.)

- **FasalGuide — Personalized Farm Advice**

Developed a farm advisory app that consumes OpenWeather API for weather-driven recommendations and uses Leaflet.js to display geospatial farm data on interactive maps. (React, OpenWeather API, Leaflet, Node.js, MongoDB.)

- **FixMyCity — Civic Issue Reporting**

Created a citizen reporting platform with image uploads, user submissions, and an admin panel for tracking civic issues. (React, Express, MongoDB; handled file uploads and simple admin workflows.)

- **Real-time Weather Dashboard**

Responsive dashboard showing live weather data via API, focused on clean UI and efficient API consumption. (React, OpenWeather API.)

Other Activities & Achievements

- Participated in multiple hackathons — rapid prototyping, teamwork, and demo delivery.
- Active contributor to CSI-CATT Tech Team — website improvements and event support.
- References available on request.

Availability: Open for internships and freelance Fullstack / MERN development roles.
