SUMMARY

Full-stack developer (MERN) and B.Tech Computer Engineering student who ships work real people use. I built the frontend of SIMS, a student management system with 500+ registered students, and my space dashboard Singularity placed Top 8 out of 100+ entries at Code-A-Thon 2.0. Elected Technical Co-Lead of CSI-CATT DMCE for 2026-27.

EDUCATION

B.Tech, Computer Engineering · Datta Meghe College of Engineering · CGPA: 8.365 / 10 — 2024 – Present

HSC (Classes 11–12), Science · Abhishek Vidyalayam · 70% — 2022 – 2024

CBSE (Classes 7–10) · Elpro International School · 89% — 2018 – 2022

EXPERIENCE

Technical Co-Lead · CSI-CATT DMCE — Jul 2026 – Present

- Elected by the chapter to lead the technical side of the college's Computer Society for 2026-27.
- Plan workshops, hackathons, and dev projects, and guide the team through each build.
- Led the design and delivery of an event attendance app and an aptitude exam platform for the whole college.

Frontend Intern · Datta Meghe College of Engineering — Aug 2025 – Mar 2026

- Owned the frontend of SIMS, a student information system (React, Vite, Tailwind) with three user roles and 500+ registered students, built under the Head of Department.
- Worked across the stack with Express and MongoDB, and integrated APIs like OpenWeather and Leaflet into student-facing apps.
- Received an internship certificate and a Letter of Appreciation for the work.

PROJECTS

Singularity · React, Three.js, Node.js, MongoDB, Gemini AI

- Space exploration platform with live ISS tracking, a 3D WebGL globe, aurora heatmaps, gamified learning, and a context-aware AI chatbot.
- Placed Top 8 out of 100+ entries at Code-A-Thon 2.0, built by a team over 1.5 months.

SIMS · React, Vite, Tailwind, Node.js, MongoDB, JWT

- Live student information system for academic records, internships, placements, and achievements across three user roles.
- 500+ students registered. I owned the frontend end to end.

Scaffold · React

- Frontend-only prompt library with design and workflow prompts, built and maintained solo.

Recipe App · React, Node.js, MongoDB, Groq API, Tailwind

- AI recipe app that matches recipes to the ingredients you have, with custom recipes, nutrition breakdowns, and a taste profile built from your history.

Campus Connect (in progress) · React, Node.js, MongoDB, Tailwind

- Campus-only marketplace for buying, selling, and renting items and offering skills like tutoring, designed around verified student profiles.

ADDITIONAL WORK AND ACHIEVEMENTS

- **College Aptitude Platform:** backend lead on an aptitude exam platform for the whole college. Tuned and optimized the backend, and 50 to 70 students took exams on it.
- **CSI Attendance App:** designed a full-stack event attendance app and led the team that built it (live).
- **Technitude:** one of four developers on the event website, which handled game registrations, and a contributor on the Big Shot browser game.
- **Smart India Hackathon:** co-built two prototypes with teammates, an AI/ML well drilling prediction model and an AI-based energy management app for polar regions.
- **Teaching:** run version control workshops for college peers and stream builds on YouTube.
- **Sports:** 2nd place in Table Tennis Doubles, DMCE Milestone 2025.

SKILLS

- **Frontend:** React, JavaScript, HTML, CSS, Tailwind, GSAP, Framer Motion, Three.js
- **Backend:** Node.js, Express **Databases:** MongoDB, MySQL
- **Languages:** Python, Java, C++, C **Tools:** Git, GitHub, Vite, Postman, VS Code
